

Production Stop for PowderCenter and MagicCenter

St. Gall, Feb 12th 2013

Dear all

The OptiCenter generation runs since a certain time and has become a great success in all markets worldwide. The same time, only a few PowderCenter and MagicCenter have been sold during the last 24 months. Gemma Switzerland GmbH decided therefore to stop the production of these units.

With immediate effect, all PowderCenter type VZ and the MagicCenter MC02 are not in production anymore. Any further order for Powder Management Systems will be executed with OptiCenter Powder Management Systems.

Spare parts for MagicCenter and PowderCenter are still available.
