

## Termination of spare part supply for ACR Reciprocators and PRC Control units

### Additional information related to newsletter 06/13

St. Gallen, Feb 21<sup>st</sup> 2013

Dear all

Following the reaction on the announcement, Gema Switzerland has decided to launch a **RETROFIT PROGRAM** for the replacement of the ACR/PRC units.

Terms and conditions will be provided on request to each distributor individually.

These special conditions are valid for orders placed until December 31, 2013

To be able to plan production capacity for the new reciprocators and controls we need your support.

**Please fill in the attached form with the required information and return it to your respective Area Sales Manager by March 15 latest.**

Your input will help us to maintain a good delivery performance.

#### Spare part supply for ACR/PRC reciprocators

A list of spare parts still available is being prepared and will be published soon.

The most critical components include

- electronic components, such as circuit boards and power supplies
- motors / gears

Prior to confirm the availability of a spare part to a customer we suggest checking the actual stock status with our Spare part order desk.

Best regards
